Member of the Federation of Mechanical engineering industries (FIM), the CISMA (association of equipment manufacturers for construction, infrastructure, steel and handling) is a professional organization. The trade association gathers businesses based in Europe that conceive, produce and sell equipments for Construction, Infrastructure building, the steel industry and Handling; it also includes suppliers of components and equipments made specifically for these materials.

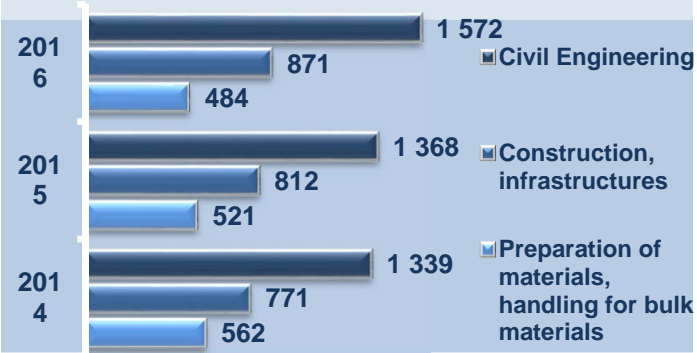

Today the CISMA is big of 200 members - SME, SMI and subsidiaries of international groups - that employ around 31 000 people in France. These businesses export 58% of their production and generate a revenue of 7,86 billion Euros.
